

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

April 1st through 15th, 2004

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 1-15, 2004**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Associate Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

**ENVIRONMENTAL DOCUMENT FILINGS
WITH THE STATE CLEARINGHOUSE
Calendar Years 1999 through 2003**

	NOP	EIR	ND/MND	NOD	NOE	EA	EIS	OTHER	Total Documents	Total Projects

	Variance to exceed floor area ratio permitted in the R4-1 zone. Other City actions include: Permit for Excavation and Grading of approximately 30,000 cubic yards of dirt, Haul Route Permit for Export in excess of 1,000 cubic yards of dirt, and all other Grading, Building, and Construction related permits granted under the authority of the Department of Building and Safety.		
2003121126	Allen Road Crossing at the Kern River Bakersfield, City of Bakersfield--Kern The project consists of construction of a new six-lane all-weather bridge over the Kern River from approximately 1,100-feet north of Ming Avenue to approximately 1,700-feet south of Stockdale Highway. The 1,700-foot link would connect the existing Allen Road at Stockdale Highway with improvements planned for Allen Road south of the Kern River at Ming Avenue. The Allen Road bridge right-of-way would cover approximately 3.4-acres.	EIR	05/17/2004
2004041004	El Monte Dairy Establishment (Case No. PSP 01-081) Tulare County Resource Management Agency --Tulare Request for: 1) approval of a Special Use Permit to expand an existing dairy authorized by Special Use Permit No. PSP 82-057 to allow an increase in the number of animal units and the addition of 360 acres of land to a 679-acre total site in the AE-40 (Exclusive Agricultural - 40 acre minimum) Zone. The applicant proposes an increase of 900 milk cows and an increase of 3,099 animal units. Therefore, the expansion requested is from 1,200 milk cows and support stock to 2,100 milk cows and fewer support stock, resulting in an increase from 2,106 animal units to 5,205 animal units in a facility covering approximately 102 acres of the 679 acre subject site. The balance of the acreage would remain under cultivation and available for irrigation with reclaimed dairy wastewater and 2) approval by the California Regional Water Quality Control Board, Central Valley Region, of a Notice of Intent under a General Waste Discharge Order or a request for site specific Waste Discharge Requirements.	NOP	04/30/2004
2004041005	Water Well Located on the Cambria Ventures, Inc. Property Livingston, City of Livingston--Merced Construction of a water well consistent with City requirements for the underlying approved subdivision.	NOP	04/30/2004
2004041008	Los Gatos Creek Annexation - City of Coalinga Coalinga, City of Coalinga--Fresno Annexation of the 345 acres of land adjacent to City limits, development of approximately 165 acres into 600 residential units with the additional 156 acres proposed for the development of 500 residential units (future project).	NOP	04/30/2004
2004042009	Pacific Gas & Electric Company San Joaquin Valley Operation and Maintenance Habitat Conservation Plan Fish & Game Commission --San Joaquin, Stanislaus, Kings, Kern, Mariposa, Madera, ... USFWS and DFG are reviewing the request to approve a HCP and issue incidental take permits under Section 10(a) and 1(B) of the ESA and Section 2081 of the CESA for PG&E's operational and maintenance activities in the San Joaquin Valley. 2004041002	City of Murrieta Vesting Tentative Tract 29820 and Development Plan 02-478 Murrieta, City of Murrieta--Riverside The proposed project is the development and construction of 159 condominium units on 12.72-acres to be located on APN 909-02-012 zoned for Multi Use 3 and APNs 90-02-013 and -014 zoned for Multi Family 1. The project includes 53 three-bedroom units and 106 two-bedroom units. The project will have two access drivers from Adams Avenue.	Neg	04/30/2004
2004041003	City of Murrieta Vesting Tentative Tract 31324 and Development Plan Murrieta, City of Murrieta--Riverside The proposed project is the construction and development of 93 three-bedroom condominium units to be located on 7.9 acres (APN 909-020-054-3, 909-020-045-5, and 909-020-046-6) zoned for Multi Use 3. The proposed project includes 84,940 sq. ft. of building footprint on the 326,100 sq. ft. site, which represents about 25.2% building coverage. A common recreation area is proposed directly in front of the entrance drive off of Jefferson Avenue located between buildings 1, 25 and 31. Remaining open space is to be distributed between buildings through out the development.	Neg	04/30/2004
2004041006	Salwasser Rezone Morro Bay, City of Morro Bay--San Luis Obispo The applicant is proposing to rezone an approximately 1-acre project site from Central Business / General Commercial (C-1/C-2/SP) to Mixed Commercial / Residential and Multiple Residential - Professional with a Planned Development Overlay retaining the Specific Plan designation (MCR/R-4/PD/SP). The SP stands for Specific Plan for which the site is within the North Main Street Specific Plan Area. This SP designation will remain on the site.	Neg	04/30/2004
2004041007	Villamin Winery Minor Use Permit D020238P San Luis Obispo County --San Luis Obispo Proposal by Danilo Villamin for a Minor Use Permit to allow for the construction of a new 2,520 sq. ft. building for winery purposes and the conversion of an existing 2,730 sq. ft. barn to a winery. Wine processing activities include crushing, fermenting, pressing, barrel storage, bottling, and blending with production of 1000 cases per year at peak production. The project also includes a request for approval for grading that has been completed on the site for a building pad for the new 2,520 sq. ft. building. The project has resulted in approximately 10,000 sq. ft. of site disturbance and 300 cubic yards of cut and 300 cubic yards of fill. The proposed project does not include a tasting room or special events. The project is located on the south side of Highway 58 (California Canyon Highway), approximately 1.75 miles east of O'Donovan Road, approximately 11 miles east of the community of Santa Margarita, in the El Pomar - Estrella planning area.	Neg	04/30/2004

2004049008	Specific Plan Amendment SPA 03-003 Tentative Tract Map TTM 03-002 and Conditional Use Permit CUP 03-019 Pomona, City of Pomona--Los Angeles Tentative Tract Map to allow a 94-unit subdivision for condominium purposes and Conditional Use Permit to allow a mixed-use development consisting of 10,801 sq. ft. of retail, 94 residential units and 544 parking spaces in the M-1-SSO land use district of the Downtown Pomona Specific Plan and Specific Plan Amendment to change the land use designation from Mixed Use 1 to Mixed Use 1 / Site Specific Overlay within the Downtown Specific Plan.	NOD	
2004049009	Tentative Padel Map TMP 04-002 Pomona, City of Pomona--Los Angeles Tentative Parcel Map to allow the subdivision of a 1.7-acre lot in the M-1-S (Light Industrial with a Supplemental Use Overlay) zone into five numbered parcels and one lettered parcel for development of five industrial buildings.	NOD	
2004048001	Alco Pacific Site Removal Action Workplan (RAW) Department of Toxic Substances Control Carson--Los Angeles The soil remedial activities (RA) include excavation, removal, and off-site disposal of approximately 3,600 cubic yards of lead contaminated soils from an industrial site in an industrial area. On-going groundwater monitoring will be conducted following the completion of the soil removal action. The primary chemical contaminate of concern is lead with levels ranging between 2.7 parts per million (ppm) to 3,000 ppm with a small area up to 85,700 ppm. Petroleum aromatic hydrocarbons, polychlorinated byphenyls and volatile organic compounds (VOCs) are found at 4.8, 9.5 and 0.3 ppm, respectively. These secondary Chemicals are collocated with the lead and will be removed with the lead soil removal. The proposed remediation goal for lead is 257 ppm, based on a baseline human health risk assessment for unrestricted/residential use exposure for soil. This cleanup goal for the Site is consistent with that applied previously to other residential and schools sites. Based on the prior site characterization the depth of the excavation will extend two feet below ground surface (bgs) and in three defined areas to seven feet bgs. Also, one isolated area will be drilled out to surgically remove contaminated soil at 41 feet bgs. A backhoe will be used for the shallow soil removal and field activities are expected to last two weeks. A bucket auger drill rig will be used to remove deeper soils and this field activity is expected to last one week. The deeper drill out will be immediately backfilled with bentonite to prevent problems associated with deeper soil removals. The drill rig will stop just above groundwater thereby avoiding water table release of the soil at the bottom of the boring hole. Post-excavation confirmation samples will be collected at the bottom and sidewalls of the excavation and step out locations from the drilled areas. These samples will verify all soil contamination equal or exceeding the targeted clean up goals will have been removed. The site characterization detected VOCs and heavy metals in groundwater under the site. DTSC has determined that a regional VOC plume exists. Onsite groundwater wells will be maintained and three down-gradient groundwater wells will be installed. On-going groundwater monitoring will be conducted as part of additional remedial activities following the completion of the soil removal action. The need for future groundwater remediation has not yet been determined.	NOE

	DTSC plans to begin the RA within four weeks after formal approval of the RAW and associated Health and Safety Plan. Excavation and backfilling activities are expected to last two weeks, drill rig activities are expected to last one week. As soils are excavated, they will be segregated into stockpiles and covered with heavy plastic sheeting until transported offsite for appropriate treatment/disposal in a box type truck trailer. Unauthorized access to the excavation area will be prevented. If the excavated soils contain greater than 350 ppm lead they will be disposed of at a Class 1 landfill, 150 miles away. The disposal trucks will travel approximately one half mile and then enter the 105 Freeway to travel to the designated treatment/disposal area. The excavation will be backfilled with clean imported soils, compacted and topped with chip seal. During the RA, and approved Health and Safety Plan will be enforced. The Site will be marked and access to the excavation area will be limited to prevent unauthorized access. Site access will be monitored during working hours and open excavation areas will be fenced at the end of each day. A Fact Sheet will also be distributed notifying nearby businesses not to enter the excavation areas due to the possible exposure to lead contaminated soils.

2004048019	Updated SB610 Water Supply Assessment Report for Central Lathrop Specific Plan Lathrop, City of Lathrop--San Joaquin The Updated SB610 Water Supply Assessment Report for Central Lathrop Specific Plan is a report required by Senate Bill 610 for cities and counties to determine whether adequate water is, or will be, available to accommodate a proposed development in addition to other anticipated urban and agricultural water demands during multiple precipitation year types over a 20-year planning period. The Updated SB610 Water Supply Assessment Report that was completed for Central Lathrop Specific Plan determines that groundwater and surface water supplies are projected to meet or exceed projected demands even during extended drought conditions. Therefore, no effects on future residents or agricultural users are anticipated during dry years. In view of this demonstrated reliability of the City's conjunctive water supply strategy, future water supply will be adequate to offset future water demands.	NOE	
2004048020	Chuckawalla Valley State Prison Facility Repairs and Replacement of Existing cooling System Corrections, Department of Blythe--Riverside FACILITY REPAIRS (CLASS 1 CATEGORICAL EXEMPTION) The California Department of Corrections (CDC) will repair the following Chuckawalla Valley State Prison (CVSP) facilities: Failing Shower Facilities in the Housing Units. The shower facilities in the housing units, including the water piping, piping supports and underground waste piping, are all failing. Therefore, the shower areas in the housing units must be demolished and rebuilt. Damaged Walls and Roofs. The Walls and the roof decking on certain buildings have deteriorated due to moisture which has resulted in structural damage (such as exposing the structural steel). Structural repairs to the walls and roofs are therefore necessary to limit further structural damage. Deteriorated Roofing. Forty of the housing and facility support building roofs are reaching the end of their useful life; many of the roofs are leaking, causing structural damage, and are in need of replacement. Therefore, roofing will be replaced on these prison buildings. The facility repairs are necessary to properly maintain prison facilities. The repairs will only restore existing deteriorated and damaged facilities; they will not create new facilities or expand capacity of the prison. REPLACEMENT OF EXISTING COOLING SYSTEM (CLASS 2 CATEGORICAL EXEMPTION) CDC will replace the existing evaporative cooling units and direct expansion (DX) cooling units at CVSP with a new, more efficient, central chiller plant that will cool prison facilities to conditions prescribed in CDC's Design Criteria Guidelines. The plant will be located on a disturbed barren area within the fenced 1,782-acre state-owned prison property adjacent to the main prison facility (Exhibits 3 and 4). The prison's current cooling system uses evaporative coolers and DX (air	NOE

Documents Received on Friday, April 02, 2004

conditioning) units located at the prison buildings. The evaporative coolers run on electricity and work by combining the natural process of water evaporation with a simple air-moving system. Outside air is filtered through saturated evaporative media, cooled by evaporation, and circulated through the buildings by blower wheels. The existing evaporative coolers use approximately 9 million gallons of water per year if they are working properly (more if they are leaking). The evaporative cooling units are 15 years old, are beyond their recommended useful life, are leaking and are deteriorated to such an extent that complete failure is imminent.

The DX units, which are similar to typical household air conditioning units, also run on electricity. DX units do not use water, rather the units work by a closed loop of expanding/condensing gas that absorbs heat and cools the air directly. Like the evaporative coolers, DX units are 15 years old and are due for replacement. CDC will replace the evaporative cooling units and DX units with a central chiller plant. A closed loop will distribute chilled water from the central chiller plant to each of the prison buildings, where it will cool the air that is blown through the buildings. The water, warmed from going through the distribution loop, will return to the central plant where it will be re-cooled by a heat exchange process in the chiller units. The heat exchange process transfers heat to a separate loop that circulates water to cooling towers, which will be constructed as part of the plant. Water will evaporate and cool as it falls through the cooling towers. This cooled water will be sent back to the chiller units where it will absorb heat from the closed distribution loop, and the chilled distribution loop water will be sent out to the buildings again. The central chiller plant will use approximately 7 million gallons of water per year, 2 million gallons per year less than the existing system. Like the current system, water vapor from the evaporative cooling process will be the only emissions from the system.

The proposed central chiller plant will provide cooling for the same prison facilities as the evaporative cooling units and DX units, serving the same number of buildings and the same prison population, but with greater flexibility to control internal building temperatures. Initially, the central plant will replace only the evaporative coolers. In the future, when the DX units fail, the central plant will also be used to replace these cooling units. The central plant will provide cooler air and will cool the prison more efficiently, using less water (reducing the total water use for the entire prison by 1 to 2 percent). In addition, although the central plant has a higher initial cost, it will have a longer life and reduce maintenance costs than evaporative coolers and DX units.

2002102003	Gateway South Office Building and Fire Station Scotts Valley, City of --Santa Cruz The proposed project is an amendment to the Gateway South Specific Plan (City of Scotts Valley, 1995) to allow the construction of: 1) the Gateway South Office Building, and 2) a fire station for the Scotts Valley Fire District. The Gateway South Office building would be built on a 17.6-acre parcel west of La Madrona Drive and southwest of the Mt. Hermon Road/State Highway 17 interchange. It would entail approximately 136,000 square feet of office development on two stories, surrounded by parking for approximately 550 vehicles. Approximately 6.6 acres would be developed, with the remainder of the parcel as open space or landscaped areas. The proposed fire station would be built on a 1.5-acre site to the east of the office building site on La Madrona Drive and would entail approximately 12,000 square feet of development on two stories, with parking for approximately 23 vehicles. Nearly all of this site would be developed.	EIR	05/19/2004
2003031112	Desert Cove Golf Course Cathedral City Cathedral City--Riverside Proponents of the Desert Cove Golf Course project propose to build an 18-hole, championship golf course on 158 +/- acres. The golf course is planned for construction in the Whitewater River Wash and the East Cathedral Canyon Wash. The maintenance building (6,000 sq. ft.) and clubhouse (14,000 sq. ft.) will be located outside the washes, on lands adjacent to existing urban development. The project involves securing a use permit, Section 1603 Streambed Alteration Agreement, Army Corps of Engineers 404 permit and CWA Section 410 certification.	EIR	05/19/2004
2003121054	Redevelopment Project No. 5 Glendora, City of --Los Angeles The proposed project will adopt and implement a Redevelopment Plan. The project will merge the Agency's four existing redevelopment areas in the City (Existing Project Area Nos. 1, 2, 3, and 4), including the tax increment caps for each area. The project will also add new territory, and establish the authority to purchase non-residential real property through eminent domain in all five areas.	EIR	05/19/2004

2003062025	<p>Saggio Hills Annexation and Planned Development Plan Project Healdsburg, City of Healdsburg--Sonoma</p> <p>The project site comprises 311.45 acres, of which 52.87 acres has already been sold to Sonoma County Agricultural Preservation and Open Space District. A site plan for residential and resort development has been proposed for the remainder of the project site, along with a conceptual plan for a public park/community center. The project includes a 30.78-acre site for a community center and public park, a 2.48-acre site for up to 50 units of affordable housing, a 21.42-acre site for a resort, 140.95 acres of large estate lots ranging in size from 0.72 to 7.65 acres as site for 48 single-family homes, 45.05 acres of agricultural reserve, and 0.91 acres for common parcel land to be used for property management and a water pressure booster station. An optional plan involves replacement of 21.42-acre resort site with 12 additional single-family homes. Both options for this area of the project site are assessed in the Draft EIR.</p>	EIR	05/20/2004

2004041027	<p>Change of Zone No. 6826 Riverside County Planning Department --Riverside</p> <p>Change of Zone No. 6826 proposes to change the existing Rural Residential (R-R) zoning designation to R-1 (Single Family Residential). Tentative Tract Map No. 31537 proposes to subdivide 211 acres into 687 single family residential units with 7,200 square foot minimum lot sizes. In addition to the residential lots, the project would also create 39 non-residential lots used for landscaping, natural open space, detention areas and park site.</p>	NOP	05/05/2004
2004041035	<p>Flying Flags Residential Buellton, City of Buellton--Santa Barbara</p> <p>The proposed project would include a development plan for 224 residential units, consisting of a mix of single-family cluster and apartment residential development.</p>	NOP	05/05/2004
2004021028	<p>CDP/PK 03-030 404-480 Washington Boulevard, Marina Del Rey, CA 90292 (Parcel 95/Parcel LLS) Los Angeles County --Los Angeles</p> <p>The proposed project is a request for a Coastal Development Permit to allow for the redevelopment of an existing shopping center (22,293 sq ft) located on Parcel 95 and a public parking lot on Parcel LLS, and the subsequent construction, operation, and maintenance of a commercial retail center consisting of four (4) buildings, surface and rooftop parking facilities with 234 vehicle spaces, and a public park with a small performance stage. Demolition of 16,680 sq ft of the existing shopping center will occur prior to new construction, with the exception of the 5,713 sq ft restaurant on the west side of the parcel which will be renovated but not demolished (Building D). There will be a total of four (4) commercial/retail buildings on site after construction totaling 39,266 sq. ft. (this total includes the existing 5,713 sq. ft. restaurant that will remain on site; but does not include the 450 sq. ft. of proposed outdoor dining area). After construction, there will be three</p>	Neg	05/05/2004

	new structures: Building "A" (two-stories, 19,803 sq. ft.) is designed for a bank, restaurant, and offices; Building "B" (14,200 sq. ft.) is designed for a restaurant and retail use; and Building "C" (a two level parking structure with rooftop parking partially over Building "B"). The proposed project represents a 16,873 sq. ft. increase over the current uses on site. On the east side of the site, Parcel LLS will be renovated from an existing 10-space public parking lot into a public park. Also requested is Parking Permit to allow the provision of 225 on-site parking spaces instead of the 261 required spaces (41% reduction). 80 of the 225 space provided on site would be tandem spaces (with a professional valet parking service to manage these spaces). It will take approximately 14 working days for demolition, clearance and grading of the existing site and it is estimated that ten truck trips per proceed south on Lincoln, and then proceed in the 90 (Marina) Freeway on ramp.		
2004041024	California Dept. of Water Resources and U.S. Bureau of Reclamation Kern Refuge Water Conveyance Agreement Water Resources, Department of Delano--Kern The purpose of this project is to draft a conveyance agreement with Reclamation that will provide use of SWP facilities to convey CVP water to Buena Vista Water Storage District to be delivered to Kern Refuge. Use of SWP facilities will enable Reclamation to meet the CVPIA directive to provide firm water supplies to Kern Refuge. DWR will be reimbursed for the use of SWP facilities.	Neg	05/05/2004

2004042035	Two Bar Creek Culvert Santa Cruz County --Santa Cruz This project is the repair of a 13.5-foot diameter metal culvert. The project involves cutting holes in the bottom of the culvert, pumping concrete into the voids to cover the corroded culvert floor, and pouring a concrete cut off barrier at the inlet. Baffles will be installed to improve fish passage, and a pool with concrete lip will be created in the bedrock to enhance fish entry into the culvert. The project is located at the crossing of Two Bar Creek and Two Bar Road, in the Boulder Creek area, at Post Mile (P.M.) 0.85. The project requires a Riparian Exception.	Neg	05/05/2004
2004042036	Rynearson Final Map Subdivision / Special Permit / Street Name Assignment Humboldt Community Services District --Humboldt A Final Map Subdivision of an approximate 7.6 acres into 21 lots. The subdivision is to be phased: Phase 1 results in Lot 3 and a Remainder and Phase II subdivides the Remainder into Lots 1, 2 and 4 through 21. Lot size ranges from 10,000 to 18,000 sq. ft., with Lot 3 at 60,215. A Special Permit is required to allow for an exception to the lot width / depth ratio. The subdivision will site detention basins at two locations, Lot 1 and Lots 10 and 11. The subdivision will be served by community water and sewer and will site an existing single family residence, detached garage and accessory structure onto Lot 3. An existing residence, greenhouse and accessory structures will be removed as part of the project. The subdivision will be accessed via Tasi Lane and Sutter Road. The project includes a Street Name Assignment of "Hannah Court" to the interior access road.	Neg	05/05/2004
2004042037	Eaton Ranch Subdivision (S03-15) Chico, City of Chico--Butte Subdivide 9.4 acre site to create 54 lots for development of Single-Family Residences. Lot sites range from 4,500 to 7,768 sq. ft., average lot site at 5,220 sq. ft.	Neg	05/05/2004

2003052068	Z02-09 / PD02-02 / S03-07 El Dorado County Planning Department --El Dorado Rezone from Estate Residential Five-acre (RE-5) to Commercial-Planned Development (C-PD); development plan for a mini-storage facility consisting of 15 buildings; and special use permit it allow a mini-storage facility within the Commercial Zone District.	NOD	
2003091101	Construction of the Zone 2 Transmission Pipeline Project - Line No. 9804 Yorba Linda Water District Yorba Linda--Orange The Zone 2 Transmission Pipeline Project will serve as a dedicated transmission main from the existing Highland Pump Station to the existing Bastanchury Reservoir. The proposed construction of the water transmission pipeline would span approximately 8,700 sq. ft. from the Highland Booster Station to the Bastanchury Reservoirs and will allow groundwater to be moved directly from Zone 1 Highland Reservoir to the Zone 2 Bastanchury Reservoir. Includes valves and underground piping and related equipment.	NOD	
2004012064	Kurt Kramer Humboldt County Planning Department --Humboldt This project involves the retroactive permitting of several hundred cubic yards of fill material placed on the property, some of which was placed in a wetland. The project also includes the permitting of four new single family residences, one on each parcel, and each residence is proposed to have an attached second unit. The new homes will be approximatey 1000 square feet in size, and the second units will be close to 700 square feet in size. They will all be single story, with wood siding and asphalt composition shingle roofing material. Mitigation for the project will include the development of a wetland area on the west side of the homes. All parcels will be served by public water and sewer.	NOD	
2004021094	EA 2001-24 Clovis, City of Clovis--Fresno The City of Clovis and the Fresno Metropolitan Flood Control District (FMFCD), in conjunction with the California Department of Fish and Game, Clovis Unified School District, and Fresno Rescue and Wildlife Rehabilitation (FWR), have proposed the development of a nature education center to be located within the City of Clovis. The proposed facility will be located on land previously acquired by the City of Clovis for park site, as well as on land purchased by the FMFCD as a storm water basin and flood detention basin. The primary purpose of FMFCD's land will remain storm water management, but this location has been determined to be suitable for a dual use as a recreational facility. The site will feature a wildlife rehabilitation program, fishing lakes, nature trails, an outdoor amphitheater, and adequate onsite parking. (EA 2001-24).	NOD

2004048076	Parking Lot, Lake Perris SRA (03/04-IE-28) Parks and Recreation, Department of --Riverside Pave an approximately 87x111'dirt overflow parking lot within the developed area adjacent to SURCOM Offices, providing 10-12 employee parking spaces.	NOE	
2004048077	Installation of Regulatory Signs, Lake Perris SRA (03/04-IE-23) Parks and Recreation, Department of --Riverside Educational signage will be installed at various points around the northern park boundary. Post holes will be approximately 18" deep and may or may not be reinforced with concrete.	NOE	
2004048078	CUP 03-005/MCHP 03-065, Crab Pot Restaurant San Clemente, City of San Clemente--Orange Request to allow a new restaurant use for the existing base of pier concession stand to include minor exterior improvements, limited evening hours, off-site parking and the sale and outdoor consumption of a full range of alcoholic beverages.	NOE	
2004048079	TSRA Residence #1 Plumbing Repairs Parks and Recreation, Department of --Placer Repair of broken water lines in Historic Residence #1 at Tahoe State Recreation Area. Emergency work is needed to repair the damaged plumbing system from frequent freezing/thawing cycles resulting in broken pipes. The water piping system will tee off the service entry connection after the main shut-off valve, and surface mount the cold and hot water lines to the outside of the building, teeing off the system into the structure at each utility connection. A 18x8x18 inch hole will be excavated to replace the existing wooden (non-historic) valve box. Installation of plumbing pipes over the 1x12 inch fir board that presently is attached to the structure's girders and posts to restrict animal occupation.	NOE	
2004048080	Emergency Septic System Replacement - Residence #6 Parks and Recreation, Department of --Nevada Repair the damaged cast iron septic system. Several leaks have been noted along the existing system and the current leach field has reached capacity. Existing system to be abandoned in place and backfilled with sand. The new system will connect with the existing system at a pipe located outside of the residence and connect to the new septic tank. Excavate a hole approximately 2.5 ft. wide and extending 6 ft below ground surface to install the septic tank. Excavate a 3 ft. deep trench for a distance of 75 ft. to install the leach field. Natural and cultural resource monitors will be on-site as necessary throughout the project and work will be completed in compliance with all federal, state, and local regulations, permitting requirements and DPR policies.	NOE	
2004048081	Automated Pay Station Installation Parks and Recreation, Department of --Alpine Install two self-contained accessible automated pay stations at Grover Hot Springs State Park to allow visitors to pay for Day Use fees without park staff assistance. Mount one station at pool kiosk to the existing concrete deck inside and to the left of the pool entrance gate; the second on the east side of the campground kiosk to	NOE

2003061128	San Jacinto Retail Center San Jacinto, City of San Jacinto--Riverside The San Jacinto Street Retail Center project consists of the construction of a retail shopping center on an approximately 26.48-acre site. The retail shopping center includes a total of approximately 260,420 square feet of retail space and will consist of one major retail store, two fast-food restaurants, a sit-down restaurant, an additional retail use, and a 6 pump (12 fueling position) gas station. The proposed project includes the construction of an approximately 229,500 square foot big box commercial retail space, with the aforementioned gas station including an approximately 210-square foot kiosk, and approximately 30,710 square feet of additional retail and restaurant space on a total of 6 parcels. A 20.54-acre parcel will be designated to the major retail store and a 0.59 acre parcel will be designated to the 6-pump gas station. The fueling station and kiosk will be located under a canopy cover. The four parcels located on San Jacinto Street consist of freestanding retail pads. These parcels will be developed with an approximately 14,410 sq. ft. pharmacy with drive-through, an approximately 9,200 sq. ft. shop	EIR	05/21/2004

2004041036	Creekside Trails San Diego, City of --San Diego Otay Mesa-Nestor (Process 5) - Site Development Permit (SDP) to reduce the required parking and setbacks for 50 affordable housing rental apartment units (43,980 sq. ft. of space), 75 above-ground parking spaces, and 1,275 feet common space on a 121,097 sq. ft (2.7 acre) site at 2170 Coronado Avenue in the RM-1-1 Zone within the Otay Mesa-Nestor Community Plan, Council District 8. All of the units would be affordable to very low income households. All units would be constructed at grade. The proposed residential buildings would be two-story high rising to a maximum height of 36 feet tall. The buildings would occupy a total footprint of 20,853 sq. ft. (0.48 acres) and parking and drives occupying a total of 25,348 sq. ft. (0.58 acres) for a total of 46,201 sq. ft. hardscape (or about 38% of the lot total) and 74,896 sq. ft. (1.7 acres) landscape (or about 62% lot total). The project scope includes establishment of a 15-foot wide buffer bed, and replanting with native species pursuant to an approved revegetation plan. Fern Pines and Brisbane Box would be the dominant street trees along Coronado Avenue. Shade trees would be provided in the project such as coral trees, coast live oaks, London plane trees, and Torrey pines.	Neg	05/06/2004
2004041038	Foothill Boulevard Improvements / Pre-Zoning 04-00003 / Annexation 04-00004 Project Fontana, City of Fontana--San Bernardino The proposed project involves the construction of planned road improvements along 2.2 miles of Foothill Boulevard, from East Avenue to Hemlock. The project also involves the annexation and pre-zoning of 117 parcels on 92.4 acres of currently unincorporated land within the City of Fontana. The annexation / pre-zoning area is along the south side of Foothill Boulevard from East Avenue to Cherry Avenue (1.2 miles). Almost all parcels will be designated for land uses consistent with existing uses or Country designations, although a few parcels will be designated for uses similar to neighboring parcels, consistent with City General Plan policies. 	portions of I Street and Kendall Avenue. The proposed GP/Zone Change could allow for approximately 332,798 square feet of commercial uses. Finally, the proposed project includes a development project in a portion of the Uptown North Redevelopment Project Area (Sub area B). The proposed "Mercado Santa Fe" project consists of a retail center of approximately 96,241 square feet of retail use and parking for approximately 440 vehicles included in the preliminary project concept is a 59,241 square foot market, and 37,000 square feet of space of additional retail uses. The Mercado Santa Fe retail project site is located south of 3rd Street across from the historic Santa Fe Depot (which is undergoing restoration). Development of the Mercado Santa Fe project will necessitate the demolition of ten structures (including four residential units and approximately 85,075 square feet of commercial buildings). The proposed retail project would also require the vacation of a portion of K Street, and the extension of L Street through the project site.		
2003121068	Hemet/San Jacinto Integrated Recharge and Recovery Program Eastern Municipal Water District Hemet, San Jacinto--Riverside The Eastern Municipal Water District (EMWD) is proposing to construct and operate the Hemet/San Jacinto Integrated Recharge and Recovery Program (Program), which would convey State Water Project water via the San Diego Canal and EMWD pipelines to recharge basins located in the San Jacinto River. 2004041047	Riviera Colony LL C Torrance, City of --Los Angeles The applicant requests approval of a Precise Plan of Development, a Conditional Use Permit, and a Tentative Tract, a Waiver of the maximum height and a Variance to allow tandem parking, for the construction of a sixteen unit townhouse condominium project on a .76 acre (32,947 sq. ft.) site. The proposal is subject to approval of a Precise Plan of Development because the property is located within the Hillside Overlay District. A Tract Map is required to create the air space rights for the Townhouse units. A Waiver is requested to allow portions of the building to exceed the maximum height.	Neg	05/07/2004
2004042043	709 & 620 El Salto Drive Capitola, City of Capitola--Santa Cruz Demolition of 948 sq. ft. rental cottage. Relocation of 496 sq. ft. rental cottage. Building at a new single family home. Coastal Permit required.	Neg	05/07/2004
2004042044	Downtown Park (AKA Grove Property Acquisition and Improvement. File 879-99) Clayton, City of Clayton--Contra Costa The City of Clayton proposes to develop an approximate 1.15 acre site as a community park. The site previously acquired using Redevelopment Agency funds. The acquisition and development actions are studied in the attached Initial Study.	Neg	05/07/2004
2004042045	David Frese, et al Vesting Tentative Subdivision Map (TSM-03-02) Siskiyou County Planning Department Mount Shasta--Siskiyou The applicants propose a Vesting Tentative Subdivision Map to divide a +/- 76-acre parcel into four parcels. The proposed division would create two +/- 10-acre parcels, a +/- 20-acre parcel and a +/- 35-acre parcel. Access to Parcel 1 is proposed via driveway connection onto Summit Drive and access to Parcel 2 is proposed via driveway connection upon Upton Road. Parcels 3 and 4 are proposed to be accessed via driveway connections via Pine Grove Drive. Each of the four parcels would be served by individual septic tanks and individual private wells.	Neg	05/07/2004
2004042046	Edge Wireless - Wireless Communications Ordinance Text Amendment (Z-04-01) Siskiyou County Planning Department Yreka--Siskiyou Edge Wireless proposes an amendment to County Code Section 10-6. 1518(b)(4) - Wireless Communications Facilities, to clarify the provisions for co-located facilities to allow installation of "stealth facilities" through an administrative permit when these facilities are to be located on or within existing structures. County Code Section 10-6.1518(b)(4) currently allows administration approval of wireless facilities when proposed to be located on an existing wireless communication facility, but does not describe nor allow administrative approval on other existing non-communication facilities where co-location equipment would meet the objectives of the Wireless ordinance by limiting the proliferation of wireless communication towers. The text amendment would also add a definition of "stealth facility" to the Wireless Communications ordinance (Section 10-1518).	Neg	05/07/2004

2004041048	<p>Outback Steakhouse Seaside, City of Seaside--Monterey</p> <p>The project will include the construction of a 6,163 sq. ft. high quality, sit-down restaurant with full-service bar, outdoor patio and dedicated take-out area. The proposed hours of operation are 4 PM to 11 PM, seven days a week. The restaurant will have approximately 261 seats which include 227 seats inside and 34 seats in the outdoor patio area. The patio will be uncovered and will have a railing to define this space.</p>	Neg	05/10/2004
2004041049	<p>Wiseburn School District Wiseburn School District Hawthorne--Los Angeles</p> <p>The proposed project would include the following: addition of a new six classroom building with a new restroom unit at Peter Burnett Elementary School, and the replacement of the existing schools at Jan Cabrillo Elementary School and Richard Henry Dana Middle School with new facilities.</p>	Neg	05/10/2004
2004041050	<p>The Village at Rosmoor Center Seal Beach, City of Seal Beach--Orange</p> <p>Demolition of 9 existing buildings and construction of 8 new buildings for a net decrease of 4,073 sq. ft. Project requires height variance approval to allow buildings to exceed permitted building height by up to 7 ft. to accommodate non-habitable architectural features in addition, the City will vacate an existing public alleyway that bi-sects the property.</p>	Neg	05/10/2004
2004041051	<p>Morro Bay Waterfront Boardwalk and Circulation Improvements Morro Bay, City of Morro Bay--San Luis Obispo</p> <p>The City of Morro Bay is proposing to construct a waterfront boardwalk and a system of bikeways and pedestrian paths along the Morro Bay waterfront between the Embarcadero Road / Beach Street intersection and Morro Rock. Circulation improvements on portions of Coleman Drive and Embarcadero Road are needed to facilitate vehicular and non-vehicular movement. Enhancement of the Morro Bay waterfront is needed to ensure adequate coastal access within the City of Morro Bay. The proposal project includes construction of a boardwalk along the Morro Bay waterfront, realignment of Coleman Drive and extension of Embarcadero Road, and construction of a Class 1 bicycle path and pedestrian paths along Embarcadero Road and Coleman Drive. Alternative A-1 (Shorter Coleman Drive Realignment) would result in a shorter realignment of Coleman Drive of approximately 180 meters (600 feet) extending from the proposed Embarcadero Road extension, intersecting with the existing Coleman Drive adjacent to the waterfront approximately 46 meters (150 feet) east of the proposed project alignment. The remaining length of Coleman Drive continuing westward would be improved to the 9.75 meter (32-foot) width similar to the proposed project. No other aspects of the proposed Waterfront improvements would be modified. Alternative A-2 (Longer Coleman Drive Realignment) would result in the realignment extension of the roadway from the proposed Embarcadero Road extension directly westward approximately 340 meters (1,100 feet) to where it would intersect with the existing Morro Rock unpaved parking area. The realignment alternative would be approximately 90 meters (300 feet) longer than the proposed project, but it would result in the existing Coleman Drive along the Morro Bay waterfront reserved completely for bicyclists and pedestrians. No other</p>	Neg	05/10/2004

	aspects of the proposed project would be modified. Alternative B (the No Action Alternative) is also evaluated in their Environmental Assessment.		
2004041052	CUP 03-120 6525 Norwalk Boulevard, Whittier CA 90606 Los Angeles County Department of Regional Planning Whittier--Los Angeles The proposed project is a request for a Conditional Use Permit (CUP) to allow for the addition of twelve (12) modular classrooms buildings (totaling 8,640 sq. ft. configured as three structures) in order to hold church-related educational activities, and for the continued use of the site as a church facility. The project site is currently used as a church and daycare facility and operates under existing CUP 2010 granted in 1982. The new modular classrooms will be arranged in three clusters with the following square footage and maximum occupant capacities: 1) 3,600 sq. ft. / 180 occupants; 2) 2,880 sq. ft. / 144 occupants; 3) 2,160 sq. ft. / 108 occupants. The maximum occupancy load for the largest existing assembly room on the site is 316. The classroom building will be used for youth and adult church activities from 8:00 am to 2:00 pm on Sundays, from 6:00 pm to 10:00 pm on Wednesdays, and other occasional church activities during the rest of the week. The daycare center is authorized under the existing CUP for a maximum of 35 children; no change to this number is proposed. A new asphalt driveway is proposed thru the interior of the site providing regular and emergency vehicle access to the existing parking lot and new classrooms buildings. There will be a total of 81 parking spaces provided on site. The applicant anticipates constructing permanent classrooms to replace the proposed modular building with permanent structures of the same approximately size within five to seven years.	Neg	05/10/2004
2004042047	Sanderson Subdivision Anderson, City of Anderson--Shasta The project would create 262 single-family parcels on approximately 194 acres. The project requires a Vesting Tentative Subdivision Map and approval of a conditional use permit by the City of Anderson to allow clustering of the homes on the ridge top and smaller individual lot sizes than permitted in the Hillside Slope Combining District (H-S) and may include a Development Agreement that includes infrastructure improvements, including phasing, locations, timing and provisions for reimbursement. 2004048215	Restroom Installation at OHV Training Area Parks and Recreation, Department of Gorman--Los Angeles The purpose of this project is to install a new pre-cast "CXT Gunnison" vault restroom, with the odor free vent design (see attached diagrams) adjacent to the District maintenance yard, between the OHV training area and the shooting range. (see attached location maps and photos). The foot print dimentions of the new restroom are 14'7" by 8'6", the height of the new restroom is 9'0". The required excavation for the new ABS lined sealed vault will be 6'6" x 14'7 1/2" x 4'4" deep. The new pre-cast concrete/steel reinforced double restroom structure meets all current earthquake, hurricane and ADA requirements. This locatino is remote, having no water or sewer service, therefore, the restroom will be of a vault style, requiring a pumping service for evacuation. The vault will be completely sealed from concrete and soil interaction. The building will be painted approved State Park natural tone colors.	NOE	
2004048216	Track and Field Facility Artificial Turf Installation at Mission Hill Jr. High School Santa Cruz City Schools Santa Cruz--Santa Cruz The project at Mission Hill Jr. High School constist of removing both the existing grass field and decomposed granite running path and replacing them with a synthetic infilled turf playing surface and new running path that is covered with an all-weather running surface. Two new softball backstops will also be included in the project to make the facility usable for multiple user groups. The new field will be permanently striped for both soccer and softball. The area of the new field will be approx. 99,250 s.f. and the new running path will be approx. 15,250 s.f. Total site square footage for this project is approx. 114,500.	NOE	
2004048217	Amendment of Rule 201.1 (Permits to Operate for Sources subject to Title V of the Federal Clean Air Act Amendments of 1990) Kern County Air Pollution Control District --Kern Rule 201.1 (Permits to Operate for Sources Subject to Title V of the Federal Clean Air Act Amendments of 1990) was amended (Subsection VI.B.14.) to render it U.S. EPA approveable. Compliance certification requirements were clarified.	NOE	
2004048218	A/C 9552900 Remodel for CRISP University of California, Davis Sacramento--Sacramento This project will remodel approximately 19,000 GSF of the existing Warehouse Building to accomodate academic offices and dry research.	NOE	
2004048219	Increase In School Facilities Fees Turlock Joint Union School District Turlock--Stanislaus District increase in school facilities fees as authorized by statute and made applicable to residential and commercial/industrial development.	NOE

2004041059	Tentative Tract Map No. 16854 Adelanto, City of Adelanto--San Bernardino The proposed project is a 49-lot detached single-family subdivision on approximately 12.5 acres with a minimum lot size of 7,200 sq. ft.	Neg	05/13/2004
2004041060	Monitoring Wells in Bunker Hill Basin San Bernardino Valley Water Conservation District Highland, Redlands--San Bernardino The District recently received a grant from the California Department of Water Resources under the Local Groundwater Management Assistance Act of 2000 (AB 303) to construct two dedicated monitoring wells located just north and south of the Santa Ana River spreading grounds.	Neg	05/13/2004
2004041061	Highlands Sewer Connection Carmel Area Wastewater District (CAWD) Carmel--Monterey The proposed project will eliminate the existing wastewater treatment and disposal activities of the Highlands Inn and the HSA, and redirect the wastewater generated from these entities to the CAWD treatment facilities. The Highlands Sewer Connection Project will combine the wastewater from the Highlands Inn, the Tickle Pink Inn, and HSA and convey it to a new pump station located on the Highlands Inn property. New and existing sanitary sewer lines would then convey the wastewater to the CAWD Calle la Cruz pump.	Neg	05/13/2004
2004041062	EA SD 2-04; ZC 16, Map 125-7; PD 5, Map 125-7 Kern County Planning Department Bakersfield--Kern A) A zone change from E (1/2) RS to M-2 PD on 14,565 sq. ft. and B) A Precise Development Plan to allow the development of a tire sales/service shop in an existing 1,600 sq. ft. building. Request for a change in zone district and approval of a PD plan in order to develop a tire sales/service shop on a 14,565 sq. ft. portion of two parcels totaling 1/2-acre. The site's existing zoning of E (1/2) RS is inconsistent with its specific plan map code designation of 7.2 and the type of development proposal. Approval of a change in zone classification is necessary to bring the site's zoning into consistency with the Mayfair Specific Plan and allow development of the site as proposed. Access would continue to be by Weedpatch Highway (State Route 184) and Prata Street. Water supply and sewage disposal would continue to be by Choate Street Mutual Water Company and individual septic tank system, respectively. The purpose of the M-2 District is to designate areas for general manufacturing, processing, and assembly activities. Uses may not produce fumes, odor, dust, smoke, gas, or vibrations extending beyond zoning district boundaries. More information on uses allowed in the M-2 District can be found at: www.co.kern.ca.us/planning/pdfs/zo/1938.pdf . The purpose of the PD Combining District is to identify areas with unique site characteristics or environmental conditions or areas surrounded by sensitive land uses to ensure development in such areas is compatible with such constraints. Development in the PD Combining District is discretionary and, therefore, subject to further environmental review. No use can be established or developed in the PD Combining District until an application for development has been deemed complete and an environmental document, if required, is completed so the request can be considered at a regularly scheduled public hearing. 2004042070	Conditional Use Permit CUP2003-0021 (Stineman / Laughlin & Spence) Yuba County Wheatland--Yuba A request to expand a pre-existing non-conforming hardware and farm supply store, including a 2,400 sq. ft. addition to an existing 9,000 sq. ft. building and including a 1,200 sq. ft. nursery. Open storage areas, additional parking, landscaping, storm water retention basin, storm drain, and enclosed trash receptacle are also proposed.	Neg	05/13/2004
1994101023	Maranatha Christian School and Church, MUP 00-020, Log No. 97-08-016A San Diego County Department of Planning and Land Use San Diego--San Diego The project is a Major Use Permit for the phased development of a proposed Christian school and church consisting of classroom buildings, chapel, multi-purpose building, maintenance building, recreational amenities, landscaping and on-site parking areas.	NOD	
1995111003	Lake Rancho Viejo Unit III Grading Permit San Diego County FALLBROOK--SAN DIEGO The project is approval of a grading plan for construction of 289 homes (Unit III of Final Map 12848), on 52-acres. The applicant proposes the import of 1,100,000 cubic yards of material from legal borrow sources to raise building pads above the 100-year flood level. The project requires improvement of 2100 linear feet of the Keys Creek Channel, adjacent to the I-15 embankment.	NOD	
2001012028	Remedial Action Plan: Interim Perchlorate Remediation for Groundwater Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Sacramento Installation of piping under Morrision Creek and realignment of the drainage ditch.	NOD	
2003052058	Stream Alteration Agreement R4-2003-0161 Turlock Irrigation District 115-kV Transmission Project Turlock Irrigation District --Stanislaus The applicant proposes installation of eight transmission poles in the floodplain of the San Joaquin River to support a 115-kV transmission line. Steel or spun concrete poles are proposed for installation within the floodplain to avoid leaching of preservatives used on wood poles. All but one of the poles on the floodplain between the levees would be embedded in augured holes approximately 10 feet deep with no foundations. To provide support for the river crossing, one pole on either side of the river would be set in concrete foundation.	NOD	
2003062098	Petition to Change Water Right License 5517 (Application 11638) State Water Resources Control Board, Division of Water Rights St. Helena--Napa The original petition in 1999 was to add "Domestic" to the Purpose of Use, to add 20 acres to the Place of Use, and to correct the description of the Point of Diversion. A subsequent petition was filed to add "Frost Protection" to the Purpose of Use. A second public notice was issued on March 15, 2002. No protests were received.	NOD

2004012128	State Route 88 and Dalton Road Intersection Caltrans #10 Jackson--Amador Jackson Rancheria Casino proposes to construct a new road approach, Dalton Road, which would connect to State Route 88. The new intersection would have a traffic signal and would be located approximately two miles east of the City of Jackson.	NOD	
2004012129	Community Domestic Wastewater System Improvements for City of Wheatland Wheatland, City of Wheatland--Yuba The major components of the proposed wastewater system improvements include: I. Cleaning, inspection, repair and replacement of major portions of wastewater collection system; II. Addition of needed components, such as manhole structures and cleanouts, within the existing collection system; III. Major overhaul of three of the sewer system's five existing lift stations; IV. Construction of additional sludge beds and clarifier at the wastewater treatment plant in order to safely process existing system loading; V. Repair, replace or upgrade of other components of the wastewater treatment plant that threaten to cause general system failure under existing loading, and VI. Installation of a centralized SCADA control system to efficiently monitor and operate entire wastewater system under existing conditions.	NOD	
2004021025	East Campus Infrastructure Improvemets, UCR #950403 University of California, Riverside Riverside--Riverside The proposed project consists of coordinated infrastructure upgrades to eliminate current deficiencies and provide the utility capacity necessary to support planned growth in student enrollment. The proposed project would provide improved distribution of chilled water, steam (building heating), condensate return, primary (high voltage) power, water and sewer service on the portion of the campus located east of Interstate 215/State Route 60. Construction methods will include traditional trenching, pipe-bursting and lining of existing facilities. In addition, installation of equipment to provide additional water pumping capacity and chiller capacity are included. All distributed areas will be restored following construction.	NOD	
2004021118	Psychology Building 1 University of California, Riverside Riverside--Riverside The proposed three-story Psychology Building will provide 86,526 gross sq. ft. to accommodate instructional laboratories, wet and dry research laboratories, research and shared scholarly activity space, departmental offices, academic offices and support spaces, and a vivarium.	NOD	
2004022034	Willows Wastewater Treatment Plant Improvements Willows, City of Willows--Glenn Upgrading the existing City Wastewater Treatment Plant in order to provide tertiary treatment of wastewater.	NOD

	include pedestrian and circulation improvements along Park Boulevard, provide pedestrian and landscape enhancements in the project area, provide north and south gateway elements on Park Boulevard, provide parking for War Memorial visitors, provide a greenbelt along the eastern edge of the existing Zoo Parking Lot, and relocate the Carousel and Miniature Train. The project also include revisions to the existing Zoo, Miniature Train and Carousel leaseholds, construction of a new parking lot for Zoo employees and storm water, sewer and water infrastructure improvements. The project is divided into three sections: 1) the San Diego zoological gardens expansion; 2) the San Diego Zoo employee parking lot: and 3) the Park Boulevard Promenade.		
2003021071	San Clemente Graduate Student Housing Project and El Colegio Road Improvements Project University of California, Santa Barbara Goleta, Santa Barbara--Santa Barbara The San Clemente Student Housing project provides 972 beds of student housing and 4 beds of resident managers, within a total area of 386,436 gross sq. ft. There are a total of 327 apartment units in three blocks of three-story apartment buildings fronting El Colegio Road. Parking for residents will be provided in a 4-story parking structure containing 622 spaces. An additional 220 parking spaces will be provided in on-grade parking courts located at the extensions of the main Isla Vista cross streets which pass through the housing project and terminate at the Storke field edge. In addition, 479 spaces at parking lot 38 to the North of the housing complex will be created to satisfy California Coastal Commission conditions for approval of the (recently completed) Manzanita residence hall complex.	NOD	
2003121171	Chino Hills State Park Visitor Center Parks and Recreation, Department of Brea--Orange This project would build a 3,000-4,000 sq. ft. visitor center with interpretive exhibits, restrooms, highway improvements for safe access, an entrance road, a parking area, outside interpretive elements including viewing areas and trails, limited picnic areas, landscaping, and other amenities. The visitor center would be designed to provide information to the urban areas surrounding Chino Hills State Park and serve as a trail access point for the portion of the park within Orange County. An abandoned lemon grove currently occupies the site that is adjacent to a heavily traveled two-lane highway. The highway improvements may require utility relocation, turning lanes, acceleration /deceleration lanes, or signalization. The highway improvement description will be further refined during the design and environmental review process. Moderate grading will be required to make the site suitable for the proposed uses.	NOD	
2004031030	Zone 3 Reservoir at OC-72 Irvine Ranch Water District Irvine--Orange The proposed Zone 3 Reservoir project will consist of a circular reinforced concrete water tank with a diameter of 189 feet and height of about 35 feet, inlet and outlet pipelines connecting from the water tank to the existing 48-inch pipeline from the OC-72 turnout, and a paved access road from Portola Parkway to the reservoir. The proposed tank will have a capacity of 6-million gallons with roof top and floor elevations of approximately 475 feet and 440 feet, respectively. The reservoir location will be landscaped after the construction. A permanent cut slope and berm will be constructed along the wall of the excavation.	NOD
